

BACKUP SERVICE

Quality data backup is the linchpin of business resilience, shielding against data loss and ransomware threats, and ensuring swift recovery in the face of unforeseen challenges. Recovery Point's Backup Service ensures your business is prepared for any data-related challenge whether it's operational support, disaster recovery, or long-term archiving. With a vendor-agnostic approach, we tailor backup solutions to meet your specific needs for retention, compliance, data access, and cost. Our managed infrastructure, network, and storage provide a secure secondary location for backing up data and applications, including Microsoft 365, ensuring rapid recovery in the face of data loss events.

KEY FEATURES

Local and Offsite Storage

Ensure swift data recovery with short-term retention backups stored onsite for operational efficiency. Tiered backups, leveraging immutable object storage offsite, fortify against long-term data loss, ransomware, and unexpected disruptions.

Air-Gap Backups

Our service adds an extra layer of defense to your critical data by implementing air-gapped backups. This technology physically isolates your backups from the production environment, providing an impervious barrier against malicious activities or accidental deletions.

Technology Support

Experience versatility with Recovery Point's backup service covering x86, IBM Power, and IBM Mainframe environments. Our inclusive approach ensures comprehensive data protection, regardless of your IT infrastructure.

Vendor Compatibility

Choose flexibility with our backup service, supporting a spectrum of technologies. From Veeam, including Veeam M365, to Commvault, VTAPE, and Mainframe VTL, we accommodate diverse backup technologies, ensuring compatibility with your existing setup.

Management Portal

Take command of your environment with our accessible client portal. Effortlessly manage configurations and oversee the intricacies of data backup and recovery processes, putting you in control of your data resilience strategy.

PERFORMANCE THAT MEETS YOUR NEEDS

Replication

Cloud Storage

High Availability

BENEFITS

Fast Recovery

Immutability and clean backups facilitate rapid recovery.

Enhanced Protection

Air-gapped backups guard against malicious activity or accidental deletion.

Versatile Support

Covering x86 and Mainframe environments, both physical and virtual.

Cost-Effective

Aiming to reduce Total Cost of Ownership (TCO) and maximize Return on Investment (ROI).

WHY RECOVERY POINT?

Experience

Over 40 years of recovery execution experience supporting complex IT environments

Leadership

Industry leadership recognized by the leading analysts

Reliability

Reliable, resilient solutions delivered from Uptime Institute Certified Tier III facilities

Support

Support for large heterogeneous environments and legacy systems

Network

Low-cost, national "Last Mile" network with equal access to over 700 carriers

Recognized year after year by Gartner as an Evolved Traditional DR Provider in the DRaaS Magic Quadrant and DRaaS Market Guide!

Recovery Point's compliance with NIST 800-53 meets the compliance for all security certifications listed below.

**3rd party attestations performed annually.*

ABOUT RECOVERY POINT

Recovery Point is a pure play provider of true end-to-end cyber resiliency, disaster recovery, and business continuity solutions. As an award-winning nationwide leader in business resilience services, we serve organizations ranging from the Fortune 500 to SMBs, as well as federal, state, and local governments. We have the experts, the technology, and the platform to ensure resiliency and recovery across changing cyber threats and technology environments.
